

PRIYANKA KASHYAP

Java Backend Developer

Spring Boot | Microservices | REST APIs | AWS | Spring Data JPA | MySQL

Pune, India | +91-7024688009 | pri.kashyap5@gmail.com

LinkedIn | GitHub | Portfolio

Professional Summary

Java Backend Developer with around 3 years of experience in designing and developing scalable, high-performance RESTful APIs using Java, Spring Boot, and Microservices architecture. Skilled in building resilient backend systems with Redis caching, Resilience4j Circuit Breaker, and database optimization techniques to improve system performance and reliability. Proficient in MySQL, PostgreSQL, JWT Authentication, and transaction management with strong problem-solving abilities in Agile environments.

Technical Skills

- **Programming Language:** Java (Core Java, OOP, Collections, Exception Handling)
- **Frameworks:** Spring Boot, Spring Framework, Spring Data JPA, Hibernate, Resilience4j Circuit Breaker
- **Database:** MySQL, PostgreSQL, Redis, SQL (Queries, Joins, Indexing, Query Optimization), Caching
- **Tools & Technologies:** Maven, Git, GitHub, Jenkins, Docker, AWS Basic, Postman, Apache Kafka
- **Microservices & APIs:** REST APIs, Microservices Architecture, JWT Authentication, Transaction Management
- **Frontend (Basic Knowledge):** ReactJS

Professional Experience

Software Engineer

Sep 2023 – Present Samyotech Software Solution, Indore, India

- Engineered 20+ scalable RESTful APIs using Spring Boot, enabling modular microservices architecture.
- Built transactional workflows using Spring Data JPA and Hibernate, ensuring data consistency across critical operations.
- Optimized MySQL queries and indexing strategies, reducing API response time by 20%.
- Introduced centralized exception handling using @ControllerAdvice, improving API consistency and debugging efficiency.
- **Resolved** 15+ production issues, increasing system stability and reducing incidents by 25%.
- Collaborated with cross-functional teams to define API contracts and improve system integration

Projects

1. Auto CRM – Automotive Dealership Backend Platform

- **API Development:** Designed and developed scalable RESTful APIs using **Spring Boot**, processing 5,000+ monthly records.
- **Transactional Processing:** Implemented transactional workflows using **Spring Data JPA** and **Hibernate**, ensuring data consistency across lead-to-booking operations.
- **Performance Optimization:** Improved API performance by implementing pagination, sorting, and optimized **MySQL queries**, reducing report generation time.
- **Data Validation:** Applied **Bean Validation** to enforce API-level constraints and enhance data integrity.
- **Security Implementation:** Secured APIs using **Spring Security** with **JWT authentication and authorization**, preventing unauthorized access.
- **Tech Stack:** Java, Spring Boot, Spring Data JPA, Hibernate, MySQL, Spring Security, JWT, REST APIs

2. **Factory ERP – Production & Inventory Management**

- **System Development:** Developed a modular production and inventory management system using **Spring Boot**, handling 1,000+ product records.
- **Data Modeling:** Designed **One-to-Many and Many-to-Many entity relationships** using **Spring Data JPA** for efficient data handling.
- **Transaction Management:** Implemented **Spring Transaction Management** to ensure atomic stock operations and prevent negative inventory issues.
- **Workflow Automation:** Designed production lifecycle workflows with controlled **state transitions** (Pending → In Progress → Completed), streamlining production tracking and **reducing manual effort by 25%**.
- **Tech Stack:** Java, Spring Boot, Spring Data JPA, Hibernate, MySQL, Spring Security, JWT

3. **URL Shortener – Backend Service | GitHub**

- **API Development:** Built a **RESTful URL-shortening service** using **Spring Boot** with persistent URL mapping and short-link redirection.
- **Caching:** Implemented **Redis caching** to reduce repeated database access and improve URL resolution performance.
- **Resilience:** Integrated **Resilience4j Circuit Breaker and fallback mechanisms** to improve service reliability during dependency failures.
- **Tech Stack:** Java, Spring Boot, Spring Data JPA, PostgreSQL, Redis, Resilience4j

4. **Gramini AI – Voice-First AI Assistant | GitHub**

- **AI Integration:** Built a **voice-first AI assistant for rural communities** as part of a 2-member team, focusing on accessibility and multilingual interaction.
- **LLM Integration:** Integrated **Gemini API** with multilingual voice interaction and API-based information retrieval for conversational assistance.
- **Reliable AI:** Designed the application around **verified data sources and fallback mechanisms** to improve reliability of AI-generated responses.
- **Tech Stack:** React, Tailwind CSS, Python, FastAPI, Gemini API, Web Speech API

Achievements

- **Top 9 / 180 Teams — National-Level Hackathon, IIIT Pune × IIT Bombay ACM SIGCHI (2026)** - developed Gramini AI as part of a 2-member team.
- **Pacesetter Award (Q3FY25)** for backend performance contributions.
- **Pat on the Back Award (Q4FY24)** for consistent performance.

Education

M.Sc. in Mathematics	2022	Vikram University, Ujjain
B.Sc. in Mathematics	2018	Vikram University, Ujjain

Additional Information

- Strong understanding of Data Structures and Algorithms.
- Interest in Database Performance Optimization and System Design.
